Technical Skills

Frontend Technologies: ReactJS, Bootstrap, Tailwind CSS
Backend Technologies: NodeJs, Express, Typescript, Flask
Tools: Git, GitHub, Docker, Postman, Azure, AWS, Supabase, Posgress, MongoDB. Firebase

Education

Parul University   Expected May 2026
Bachelor of Science in Computer Science (CGPA:7.58)   *Vadodara, Gujarat*
- **Relevant Coursework:** Data Structures and Algorithms (C++), Prob & Stat in CS (Python), Competitive Coding, Operating System, Database Management System,

Experience

Backend Developer   June 2024 – August 2024
Disbound LLC

Projects

Opus Stellar/| *Stellar-SDK, React, TypeScript, ExpressJs, MongoDB, LeafletJS, TailwindCSS*

* The Metaverse Platform is a virtual world where each continent represents a different fandom. Users can explore, purchase virtual land, and engage in community activities related to their favorite fandoms. The platform leverages blockchain technology, specifically the Stellar network, for managing assets, transactions, and ownership records using NFTs and custom tokens.

flask-wiz A Simplified Flask Setup Package | */Python*
* Flask-Wiz is a setup library for Flask that simplifies the process of starting a new Flask project. It provides a boilerplate setup for Flask applications, including database integration and directory structure for templates and static files.
* Key Features: 1) Flask Boilerplate: Get started quickly with a clean and minimal Flask app structure. 2) Database Setup: Choose from popular databases including MongoDB, SQLite, MySQL, and PostgreSQL for seamless integration with your Flask application. 3) Directory Structure: Automatically create directories for templates and static files, making it easy to organize your project assets.

Security Auditing Monitoring | *ReactJs, Express, Arweave-SDK, Python*
* SAM - Offchain: It helps to find out vulnerabilities in your LUA code.
* SAM - Onchain: It is a platform where users can monitor and track the incoming process coming on their Arweave Wallet and specify them.

dumdumdeploy | *NextJs, Typescript,Arweave-SDK,NodeJs*
* Deployment platform for Arweave Ecosystem.
* Connect wallet and deploy projects by providing github repository link

CodeNow | *NodeJs*
* CodeNow, a collaborative coding platform designed to streamline the coding experience. Whether you're collaborating on a project, guiding a colleague, or simply exploring new technologies, CodeNow facilitates code sharing and compilation in real-time.

permapy |/ *Python, Arweave-SDK*
* permapy is a Python package designed to interact with the Arweave network and Permaweb, facilitating decentralized storage and retrieval of data, with a focus on supporting AI/ML models and datasets.

Achievements

- **Runner-Up Stellar Indiathon**   Won $1000 as a reward at the hackathon
- **Arweave Top 30 Hacker**   Built permapy and got selected for the ArweaveHackerHouse
- **Second Runner-Up Raiders Raid III**   Won $1000 as a reward in Raid Week
- **HackSquad Top 60**   Lead the Team Dark Looters and placed in top 60 with 143 points
- **Silver Contributor - Novu**   Contributed in Novu with 6 Pull Requests Merged

Certificates

* **Prepare for the Azure Fundamentals (AZ-900)**
  Certification by LinkedIn Learning
* **Beta Microsoft Learn Student Ambassador**
* **Postman API Fundamentals**

Volunteering

* **Youth Ambassador at G20 India 2023**
* **Learn Student Ambassador at Microsoft Learn Community**
* **Community Member of The PU AI Society**
* **Event Volunteer at Projections 2023**
